

WEBINAR: Biobased membranes for CO₂ separation

June 26th – 10:00-12:00

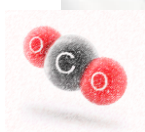

10:00 Dr. Oana David (Tecnalia):
Short intro BIOCOMEM

10:10 Dr. Angeles Ramirez and Dr Sergey Shishatskiy (Hereon):
From polymer to membrane: development of thin-film composite membrane

10:35 Dr. Oana David (Tecnalia):
Hollow fiber polymeric membranes: preparation and scale-up

11: 00 Dr. Rouzbeh Ramezani (TUE):
Membrane based process design and economics

11:25 Stefan Frehland (QUANTIS):
Biobased vs conventional polymers in the context of membranes: The LCA perspective

11:50 Discussion time
